COVER WOMAN 1956

It is with particular pride that we salute Mrs. Gertrude Roe as our cover woman for 1956. She has shown tremendous spirit and a love of the florist business that has resulted today in an up-to-date establishment in excellent condition that anyone would be proud to call his own. Roe's Florist, Easton, Maryland, was started by Mrs. Roe and her husband in 1906. When Mr. Roe died in 1936, she was quick to take charge and with continued vigor expanded the operation to its present size. Of late years she has been ably assisted by her daughter and son-in-law (Mr. and Mrs. A. G. McKewen), the fourth member of the team being Mr. Waverly George, an able greenhouse man.

BUSINESS TERMS:

ON OPEN ACCOUNT: (Flower Seeds Only). For Customers of Approved Credit 60 Days Net. The following discounts will be allowed on orders paid within 10 days: \$5.00 to \$50.00 2% — \$50.00 to \$100.00 5% — \$100.00 or over 8%.

CASH OR C.O.D. ORDERS: (Flower Seeds Only). Under \$5.00 net — \$5.00 to \$25.00 5% — \$25.00 or over 8%.

Prices in this catalog are subject to change without notice . . . All goods are offered subject to Crop Failures, Shortages or other causes beyond our control, and to being unsold on receipt of order . . . The prices in this catalog are for the trade only. For your own protection do not loan this catalog to anyone not entitled to Florist or Wholesale prices . . . Unknown correspondents desiring to open an account are requested to furnish three trade references with whom they have had credit relations.

WARRANTY AND LIMITATION OF LIABILITY: Subject to the limitations of liability herein set forth, we warrant that the seeds or bulbs sold are as described on the container, within recognized tolerances. Our liability on this warranty is limited in amount to the purchase price of the seeds or bulbs. In no event shall we be liable for the crop, or for any loss due to the failure, impairment or quality thereof or varietal variance therein, whether such loss results from breach of the foregoing warranty, from breach of any other provision of the buyer's contract for purchase of said seeds or bulbs, or from any other cause.

*Here are a few good items worthy
of special mention this year.
Try them. We know you
will like them.*

PETUNIA FIRE DANCE

This is an F1 hybrid grandiflora and an All-America Selection for 1956. Your customers will see it featured in leading garden magazines. It is a brilliant salmon-scarlet with yellow throat. The flowers are deeply fringed and the plant is uniformly dwarf. For prices see page 19.

PETUNIA CARNIVAL

A mixture of all petunia colors in the hybrid grandiflora class. Plants have hybrid vigor yet are dwarf and compact. Some flowers are ruffled, others fringed. For prices see page 20.

MARIGOLD PRIMROSE GEM

A dwarf French double marigold of rich primrose yellow. It is an early strain and the plants are neat and compact. For prices see page 16.

Gloeckner

SPECIAL STRAIN VERBENAS

Here is a dwarf verbena adapted for growing in 2¼ and 3-inch pots. Each year its popularity grows and we are glad to be able to offer it again. Be sure and try it. See page 28 for description and prices.

AGERATUM BLUE MINK

A new tetra hybrid ageratum, Blue Mink is outstanding for its giant flowers that cover the husky plants. The plants are easy to grow, and sell on sight. For prices see page 5.

Gloeckner

SPECIAL STRAIN PHLOX

This is an exceptionally dwarf strain of phlox especially adapted to pot culture for spring sales. The mixture of colors are well balanced and bright with fine individual flower heads. See page 22 for description and prices.

OUTDOOR STRAINS

YODER BROS. HYBRIDS

\$3.50 Per Packet (2000 Seeds)

These improved hybrid snapdragons are the result of intensive hybridization. They are stiff stemmed and produce long tapering spikes. There is a minimum amount of side shoots which makes them well adapted to single-stem culture as well as for a pinched crop.

WHITE

Albion—Paper white hybrid. Ten to fourteen days later than White Knight.

Jet Pilot—A medium early paper white, long spikes.

White Knight—Improved paper white. Medium to long compact spikes with well-placed florets; growth firmer and less grassy than Snowman and flowering is earlier.

IVORY

Apollo—Larger and more vigorous than Margaret.

Citation—Earlier than Margaret, Apollo or Twenty Grand. Very large ruffled floret.

Twenty Grand—A medium early winter variety.

ROSE PINK

Crusader—Color and season that of Dorcas Jane.

Gusto—Somewhat deeper than Mary Ellen. Earlier, and more uniform in flowering.

Native Dancer—A light rose pink. Recommended for mid-December through early May.

Pompey—Nearly same or little deeper than Dorcas Jane. Earlier, more vigor than Dorcas Jane.

Rowenna—Light rose pink with medium to long spikes. Flowers just ahead of Crusader or Pompey. Florets are semierect and adhere closely to the stem which makes the variety very adaptable for bunching.

Star Charter—A wide floret similar to that of Christina; vigorous uniform growth; close spacing of florets.

Wintergreen—Light rose pink of very fine quality. Unusually compact spikes with uniformly placed florets. Stiff wiry growth with complete lack of grassiness.

LIGHT PINK

Rosebud—Soft pastel pink with long spikes and giant-sized florets. Wing petals are slightly ruffled. Color holds well through April. Displays real hybrid vigor. Strong stems and marked uniformly.

Top Flight—Earlier than Christina. Greater vigor. Partially shatterproof.

Whirlaway—Medium early, large floret; close spacing; long spike; a little deeper color than Mary Ellen.

YELLOW

Broker's Tip—Deep yellow with medium-sized florets. Little or no side growth. Flowers after Seabiscuit and because of its excellent color-holding quality and its vigorous stocky growth it is well adapted for continuing its flowering later into the spring.

Day Star—Very early; good uniformity; long spike, flower a little small.

Seabiscuit—Follows War Admiral and Day Star.

War Admiral—Just follows Day Star. Closer spacing and somewhat larger florets.

DARK PINK

Pensive—A little later than Christmas Cheer.

Prestige—Lustrous dark pink; a new color in Yoder snap hybrids. Full spikes of better than average quality flowers in this color class.

Pink Star—Early. Dark pink with light salmon overcast.

LAVENDER

Bold Venture—Rich lavender or bright, light magenta.

BRONZE

Cavalcade—A lively golden bronze; extremely vigorous; long spikes; outstanding keeper.

Gallant Fox—Deep orange bronze.

Sun Briar—Lively orange bronze.

RED

Commando—A good pleasing red plus earliness, clean growth habit, marked vigor and uniformity add up to a fine novelty.

Man-O-War—More intense color than Commando. Valuable late December through mid-April.

SNAPDRAGON CULTURE

Marked changes have taken place in snapdragon culture during the past 5 years. With the introduction of new hybrid types, wider choice of colors and faster responding varieties as a result of increased research on this crop, snapdragons have become almost as versatile as mums in the year-round growing schedule. Single stem culture together with improved hybrid types have enabled many growers to plan a 12-month production program which has resulted in increased profits. Here are a few points to consider in planning a year-round program:

- 1—Use a loose, porous, steam-sterilized soil with about 1/4 peat moss by volume to which 4 or 5 lbs. of superphosphate are added per 100 sq. ft.
- 2—Seed should germinate in about 7 days at 65 to 70 deg. F., the medium uniformly moist.
- 3—Bench directly from seedling flats, about 3 weeks from the sowing date.
- 4—When benching space single stem crops 4 x 5 inches and pinched crops 6 x 8 inches. Some growers use 8 x 8 spacing for Feb. and Mar. crops when light intensity is low.
- 5—Night temperatures of 50 deg. with a drop gradually to 45 degree during the last month of the crop is practiced by many growers.
- 6—Maintain a level of about 20 ppm nitrogen and potash (Spurway) during early growth stages. Taper off nitrogen when spikes appear. Liquid feeding of winter crops is suggested at 15-30-15, 20-20-20, etc, at 1 oz. in 5 gal. of water every two weeks. Heavier feeding is practiced during the summer.
- 7—See charts opposite for flowering schedule and planting dates.

ASTERS

BODGER'S WILT-RESISTANT STRAINS QUEEN OF THE MARKET

These well-known early flowering Asters are of branching habit, about 20" tall, blooming mid-July.

Azure Blue	Light Blue or Lavender
Ballet Queen—Deep	Peach Blossom —
salmon rose	Flesh pink
Crimson	Rose
Dark Blue or Purple	White
	Finest Mixed

AMERICAN BRANCHING

Plants 2 to 2½ feet tall, branching, robust, flowers large, double and fine form. Flowers late August and early September.

Azure Blue or Dark	Sensation—Scarlet
Lavender	Shell Pink—
Crimson	(Mary Semple)
Peach Blossom	White—Extra select,
Purple	long stems
Rose	Finest Mixed

EARLY ROYAL BRANCHING

Plants branching 2 to 2½ feet, blooming mid-August, directly following the Queen of the Market.

Azure Blue or Dark	Purple
Lavender	Shell Pink
Deep Rose	White
Peach Blossom—	Finest Mixed
Lavender pink	

AMERICAN BEAUTY

Blooms from August and continues until frost. The large and double flowers are produced on long heavy stems; plants 2 to 3 feet high.

Azure Fairy—	September Beauty—
Dark lavender	Shell pink
Crimson	Silvery Rose
Deep Rose	White
Purple	Finest Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.40	\$.65	\$2.00

DWARF QUEEN

Early-flowering, 10-inch tall plants. Dwarf base-branching plants with large flowers produced in abundance.

Crimson—Crimson red	Light Blue—Lilac blue
Deep Blue—Violet blue	Rose—Rose pink
Deep Scarlet—Bright	White—Pure white
deep scarlet	Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.60	\$1.00	\$2.75

ASTER
CREGO

SHAGGY TYPES

The interlaced petals of the Asters in this group produce an attractive fluffy or shaggy flower that you will find distinctive and popular.

EARLY GIANT

Flowers are of the large Giant of California type, while the plants are shorter, about 1½ feet in height. This class is early blooming, coming into flower by the first week in September.

Light Blue	Rose Marie—Rich rose
Peach Blossom	White
	Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.50	\$1.25	\$3.75

IMPROVED CREGO

Plants robust, branching about 2½ feet tall, flowers large, double and well formed, one of the finest varieties for all purposes. Blooming mid-August.

Azure Blue	Peach Blossom
Blue Flame—Rich blue	Shell Pink
Crimson	Purple or Dark Blue
Deep Rose	White
Light Blue—Lavender	Finest Mixed

	Tr. Pkt.	¼ oz.	Oz.
Prices Above:	\$.40	\$.65	\$2.00

FLORIST STRAIN (Wilt Resistant)

Used by large commercial specialists in Asters because they have fully double flowers and lack half-single kinds with large open heads.

Azure Ball—Fully double light blue.

Pink Ball—Large 3½ to 4-inch double flowers on long stems. Rarely shows any center. Blooms mid-August. Excellent flowered under lights in early spring. Needs little disbudding as laterals are few.

Rose Ball—Fully double flowers of a good rich rose. Flowers large and solid.

Purple Ball—Similar to Rose Ball but good deep purple.

White Ball—The large pure white flowers of this new Aster are exceptionally double and borne on stiff stems. Blooms late August.

Prices Above:

Tr. Pkt.	¼ oz.	1 oz.
\$1.75	\$3.20	\$9.60

VARIOUS RESISTANT VARIETIES

CONTINUOUS FLOWERING OF ASTERS

Sow Seeds	Pot Seedlings	Bench Plants	Flowering Date Approximate
Dec. 20	Jan. 10	March 1	May
Feb. 1	Feb. 20	April 1	June
March 15	April 10	May 15	July
April 20	May 10	June 15	August
May 20	June 10	July 15	September
June 10	July 1	Aug. 15	October
June 20	July 15	Aug. 20	November
July 10	Aug. 1	Sept. 1	December
July 15	Aug. 10	Sept. 15	January
August 15	Sept. 10	Nov. 1	February
Sept. 10	Oct. 1	Dec. 1	March
Oct. 20	Nov. 15	Jan. 1	April

Plants must be given additional light between September 1 and May 1 regardless if they are in seed flats or in the bench. If the plants are not lighted while in small pots, they develop a rosette of leaves and growth of the stem and flowers is delayed. Plants should be lighted until the first flowers show color.

Low wattage bulbs will suffice for additional light. On a four-foot bench, 40-watt lamps spaced 6 feet apart and about 24 inches above the plants will give ample light for this crop.

ADDITIONAL LIGHTING SCHEDULE

- 3 hours during the months of September, October, March and April.
- 4 hours during the months of November and February.
- 5 hours during the months of December and January.

PRINCESS TYPE (Wilt Resistant)

A very attractive new cutting type of wilt resistant Aster, 2 to 2½ feet tall, branching and free flowering, early blooming, bearing quantities of flowers on strong stems. Blooms mid-August. Good shipper.

Alice—Azure blue

Anne—Peach blossom

Barbara—Orchid

Bonnie—Soft salmon rose

Elizabeth—Pure white

**BEGONIA
SAGA**

Fibrous Begonias are a necessity item for spring bedding sales. They are used extensively in combination work and are also popular house plants throughout the year.

Production from seed is simple. January sowing produces plants for spring bedding work. The fine seed is lightly pressed into a sterilized fibrous medium. The seed is kept moist, not covered, and germinates best at 60 to 70 degrees. An economical method has been to shift the seedlings to flats spaced 2 x 2 inches and grow them on until they become crowded. Then transfer to 3- or 4-inch pots.

Potting soil should contain one part peat, one part sand and one part soil—a fibrous medium that will not pack is essential. To keep the plants moving, a temperature of 60 degrees is best. The plants do well in shade or full sun, but are best shaded during the summer.

Try monthly sowings from August to March for a constant supply to meet your customer's demand.

REGULAR STRAIN

Tr. Pkt. 1/64 oz. 1/32 oz.

Multiflora Nana Mixed — Dwarf growth with large compact heads of medium sized flowers. This fine strain contains a good range of colors	\$1.25	\$5.00	\$9.00
---	--------	--------	--------

The soil used in germinating the seeds should be made up of two parts leaf mold, two parts well-rotted manure, two parts soil, and one part sand. Sterilize the soil and flat with steam to eradicate all disease.

Sow the seeds lightly over the surface and cover the flat with a suitable covering. Calceolaria will germinate better when the temperature is cool, therefore, well-shaded locations are better. August sowing will make large plants for May, while November sowing will make good 4-inch plants. Some growers have used the wick irrigation method to germinate the seed with very good results.

CALLIOPSIS DWARF

This annual is very free flowering and recommended for bedding. If continued flowering is wanted old flowers must be removed.

Scarlet Plume —4 ft. scarlet30	.70	2.25

Positively do not use soil that was previously used for Mums and especially so if your Mums were affected with Verticillium wilt or Seidewitz disease. CINERARIAS are attacked by this wilt which is a soil-borne fungus. It will cause the lower leaves to wilt and die and then gradually kill the entire plant. The only prevention for this trouble is to use new field soil from seed flats to finished pot. If you do use old chrysanthemum soil be sure to sterilize it. To be on the safe side, it is recommended to steam sterilize soil before using.

Siter's Hybrids

Trade Mark

They are a distinct improvement over the original Siter's Strain, and because they are Hybrids from original crosses, cannot be offered by anyone but the originator.

This is an entirely new group of Cineraria Hybrids, blended for a perfect combination of colors, ranging from bright-eyed types through the finer pastel shades.

These new types carry large flower heads with medium, large individual flowers.

Seed for 1000 plants.....\$10.00 Seed for 500 plants.....\$5.00

-----------------	----------------	----------------

DELPHINIUM

PACIFIC STRAIN VETTERLE & REINELT

PACIFIC STRAIN (VETTERLE & REINELT)

This is the finest strain of Delphinium yet introduced. From our personal observations in the field, we find this has unquestionably proven to be the leader in Delphiniums of the better type. The flowers are immense in size, well set on strong, straight stems, do not shatter, and are 40 to 90% mildew resistant. July or August sowing and transplanting into the field during the fall will produce an early crop with large spikes. Delphiniums require a well-drained soil, neutral in reaction. January sowing will produce flowers during the summer.

ASTOLAT SERIES

The color variations in this series extend from pale blush through lilac pink to deep raspberry rose. Large brown, fawn and black bees blend interesting contrast.

BLACK KNIGHT

Tr. Pkt. \$2.25 1/8 oz. \$4.50 1/4 oz. \$8.00

The individual florets, 2 to 3" in diameter, are **Dark Purple**, beautifully rounded form with heavy velvety texture. Very large well formed spikes.

BLUE BIRD SERIES

This series can be recommended as being the **clearest medium blues with white bees**. They carry well formed round flowers 2 1/4 inches in diameter on very long, graceful spikes.

BLUEJAY SERIES

Color striking. **Clear medium to dark blue**. Very intense and alive with contrasting bee.

CAMELIARD SERIES

A pure lavender self, with **white bee**, individual flowers are very round and flat. Excellent growing habits.

GALAHAD SERIES

Flowers **Clear White**, averaging three inches in diameter, pyramidal spikes, good branching habit, strong whippy stems with a high percentage of mildew resistance.

GUINEVERE SERIES

Light Pink Lavender self with white bee. Individual florets 2 1/2 to 3 inches in diameter. For cut flowers and show purposes. Mildew resistance—50 to 70%.

KING ARTHUR

Brilliant Royal Violet with large white bee. Individual florets 2 1/2 inches in diameter. Excellent for cut flowers. Mildew resistance from 80 to 90%.

LANCELOT SERIES

Clear Lilac self with white bee.

PERCIVAL SERIES

A companion to the Galahad Series. Large **glistening white flowers** with strongly contrasting **black bee**.

ROUND TABLE SERIES

This represents all the color combinations of the **Knights and their Ladies** which will eventually be introduced. Some three hundred different crosses were used to make up this group.

SUMMER SKIES SERIES

Clearst Light Blue with white bee. Individual florets 2 to 2 1/2 inches in diameter. Ideal for cut flower purposes. Mildew resistance—40 to 60%.

ALL COLORS MIXED

A blend containing all named colors mentioned above.

Prices for all of the above varieties except where noted:

Gloekner

FLOWER SEEDS

LARKSPUR

Larkspur seed may be sown directly in the open in the fall and will flower the following spring. There are two distinctly different methods used and each has a number of successful supporters. The first method is to sow the seed fairly early in the season about August 15th to September 15th. The small Larkspur seedlings will be sufficiently large enough when cold weather sets in to winter over when given a light mulch. The other method employed is to sow the seed in rows in late October or early November so that it will not germinate until early the following spring. This crop of Larkspur will generally come in shortly after Delphinium Belladonna.

SUPREME STRAIN

A new strain of the popular Giant Imperial or Base Branching Type of Larkspur. Plants have an upright habit with longer spikes and fuller flowers.

Dark Blue Supreme—Rich violet purple

Lilac Supreme—Clear lilac

Pink Supreme—Clear rose pink, deeper in color than Pink King and Los Angeles Improved

Rose Supreme—Clear, pure deep rose

**FOR YOUR FOLIAGE PLANT
REQUIREMENTS SEE
YOUR GLOECKNER REPRESENTATIVE.**

PRIMULA

Seed of Primula malacoides sown in June will make good flowering plants for January. September-sown seed will produce good plants for early spring; while later sowings can be grown into small plants for combinations. Little or no fertilizer is recommended during the early growth stages.

MALACOIDES

Tr. Pkt.

- Springtime**—An attractive Salmon-pink, that does not fade with age. Flower stems are strong and support a profusion of good-sized blooms. Unlike many varieties of Malacoides, the foliage has good texture and is fairly resistant to rot..... **\$2.00**
- Flamingo** — clear pink flowers, strong, compact plants **2.50**

- Red**—An outstanding glowing red. Large flowered and heavy producer **1.25 2.75**

OBCONICA

Seed should be sown in January if wanted for Christmas bloom and later. Frequent transplanting should be given until September when the plants should be set in the pots in which they are to bloom. Shade and moisture should be provided during the summer. This plant is becoming increasingly popular as a pot plant.

STOCK CULTURE

Stocks are very satisfactory for Winter and Spring flowering. Sowing the seed in August and benching in October, the first flowers may be cut before Christmas if additional light (40-60 watt lamps spaced 5 feet) is used. Without this aid, the crop will come into flower in January. Continuity of bloom may be obtained by successive sowings. This non-branching type, which has come into general use, should be planted 3 inches in the row and 6 inches between rows, producing a single stem. The branching types should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

Flowering of stocks only occurs when the temperatures are below 60 degrees for the greater part of the night. To secure the greatest percentage of doubling, the largest and most vigorous plants should be selected.

**SOWING DATES OF COLUMN OR NON-BRANCHING STOCKS
FOR THE VARIOUS BLOOMING DATES**

Time of sowing	Flowering	Time of sowing	Flowering
August 1.....	January	December 1.....	May
September 1.....	February	January 1.....	Mother's Day
October 1.....	March	February 1.....	June
November 1.....	April	February 15.....	June 15

BRANCHING

GIANTS OF CALIFORNIA

The Giants of California can also be grown similarly to the non-branching type. When grown this way, the side shoots should be removed. For the retail grower the branching types are gaining popularity. These should be planted 8 x 8 inches and topped when 6 inches tall to produce side shoots of sufficient length.

TRYSONIC GIANT IMPERIAL (Branching)

Years of research went into producing Trysonic Stock that produces 85 per cent or more double-flowered plants when sown from seed. In addition to this excellent trait, when the seedlings reach the four-leaf stage you can pick out the small, weak ones that will develop into singles and thus insure yourself close to 100 per cent double-flowering plants.

ZVOLANEK'S MULTIFLOWERED CLASS

A new, free-flowering class of Sweet Pea which produces many stems with five and six flowers. Stems are exceptionally long as well, making this a profitable market variety.

Lavender — Giant size blooms on exceedingly long stems.
Orange Cerise — Characterized by its vivid color and large flowers.
Rose — Vigorous grower with large, medium-rose flowers.
Salmon Pink — Rose-pink flowers with tinge of salmon. Four and five flowers to the stems which are long but not so strong as the other varieties in the class.

• **Whirlwind** — Considered the best white of the group. Five or six flowers of a light rose are borne on strong 14-inch stems. Vigorous grower.
White — Pure white flowers, many fives, are carried on strong stems. Good for wedding work.

	1/2 oz.	Oz.	4 oz.	Lb.
Prices:	\$1.75	\$3.00	\$10.00	\$35.00

SPRING FLOWERING CUTHBERTSON STRAIN

This class of Sweet Peas replaces Spring-Flowering of types previously offered. Indoors, seed sown November 1st, will bloom in April. The Cuthbertson Class is recommended for sowing after November 1. It needs strong spring sun to bloom.

It is exceptionally successful outdoors, in the North, flowering two weeks later than the Early Flowering, and two to three weeks earlier than the Summer Flowering.

Billy—Bright cerise rose on salmon
Carol—Strong growing clear pink
Coline—Vigorous sunproof scarlet
Danny—Navy blue
Doris—Deep cherry rose
Evelyn—Salmon cream pink
Frank G. — Strong growing lavender

Hazel—Light blue
Janet—A pure black seeded white
Jessie — Wavy flowers of clear satin mauve
Lois — Rose pink on white background

MISCELLANEOUS SUPPLIES

HIDROPON

10% Nitrogen—12% Phos. Acid
25% Potash

A most unusual combination of many soluble plant foods. Designed to control rank excessive foliage and stem growth and to promote flower production.

HIDROPON creates firm, plump, normal size foliage and stems and forces natural flower production.

It works wonders on African Violets . . . Gerbera . . . Cyclamen . . . Cymbidium Orchids . . . Snapdragon . . . Carnations . . . Bulbs . . . Roses and many other plants.

It does not alter the pH of any soil.

Trace elements mostly chelates and other products added but not claimed.

MADE BY THE MAKERS OF ELECTRA

Price: \$8.00 (25 lbs.)
\$12.00 (50 lbs.) \$20.00 (100 lbs.)

LIQUID "M" POWDERED

17% Nitrogen—24% Phos. Acid
18% Potash

A multi-purpose soluble product resulting from a study of 150 years of recorded experiments by scientists the world over.

LIQUID "M" contains every plant food requirement in many forms excepting protein and lime.

Trace elements mostly as chelates and other products added but not claimed.

LIQUID "M" has proved superior over all other products as to ratio, quality, safety, speed, control and uniform production by many growers in various sections of the country. In the field . . . under glass or slats . . . cut flowers . . . potted plants or ornamentals, LIQUID "M" is of outstanding value when used in schedule, spot or force feeding.

MADE BY THE MAKERS OF ELECTRA

Price: \$8.00 (25 lbs.)
\$12.00 (50 lbs.) \$20.00 (100 lbs.)

VITA POTS
